## 關於我

Kuan-Chia Lin, Ph.D, is an epidemiologist and biostatistician with an extensive background in hospital and health care management. Prior to earning his doctoral degree, he served as applied statistician at the Community Medicine Research Center, National Yang-Ming University in Taipei. Upon completion of his doctoral degree, he entry the Armed Forces Hualien General Hospital and assumed the position of Director of the medical record to fulfill his military service. Currently, Dr Lin is an Professor in the National Yang-Ming University, where he teaches the advanced biostatistics and research methodology at the master/doctoral level and serves as a statistical colleague on several externally funded studies. His research experience includes studies that have been conducted within a variety of settings including: community based organizations; hospital clinics; and through mailed out surveys. He is particularly interested in life course research and applied statistic methods in longitudinal study.
