## Substance Use and Public Health

[健康促進與行為科學，中文授課]

### 授課教師

陳娟瑜

### 課程評量

Course grades will be evaluated on four domains (1) 10%: class participation; (2) 30%: paper essay; (3) 20%: mid-term report; and (4) 40%: final project (term paper & presentation).

### 課程目標

This is a 2-credit course. This course is conducted mainly with both lectures, interactive discussion, and team project (e.g., debate). This course is intended to help students interested in the issues of alcohol, tobacco, and other illegal drug use from the perspective of public health.

By the end of the course, each student should have done the following tasks:

1. To understand basic knowledge pertaining to substance use and problems from at least two or more perspectives (e.g., medicine, law, sociology, psychology, politics.);
2. To be familiar with the evolution and assessment of substance use and problem at the individual, community, and national levels;
3. To work as a team to engage in the debate concerning substance-related issues (e.g., drug urine test in underage population; forced treatment, etc.)

### 主要探討議題

1. Legal and illegal substance
2. Epidemiology of substance use and problems (e.g., natural history, distribution, and measurement)
3. Health and social consequences
4. Substance use and problems in specific populations
5. Etiology and mechanism (i.e., neuroscience, genetics, psychological, and sociological perspectives)

6. Treatment
7. Prevention and intervention
8. Policy and politics
